## **DETAILED ACTION**

### ***Preliminary Amendment***

1. Acknowledgment is made of applicant's Preliminary Amendment, filed 22 August 2003. The changes and remarks disclosed therein were considered.

Claims 1-11 have been cancelled, and claims 12-17 have been added. Therefore, claims 12-17 are pending in the application.

### ***Information Disclosure Statement***

2. Acknowledgment is made of applicant's Information Disclosure Statement (IDS) Form PTO-1449, filed 28 November 2003. The information disclosed therein was considered.

### ***Specification***

3. The disclosure is objected to because of the following informalities:

The status of U.S. Application No. 09/776,029 recited on page 1, paragraph 1 of the amended specification should be updated. Said Application has matured into U.S. Pat. No. 6,611,465.

Appropriate correction is required.

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*,

Art Unit: 2824

422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 12-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,611,465 (Reference). Although the conflicting claims are not identical, they are not patentably distinct from each other because:

The method of implementing a diffusion replica delay circuit as claimed in claims 12-17 of instant Application is directly associated with the diffusion replica delay circuit claimed in claims 1-6 of Reference.

Claims 1-6 of Reference claim a diffusion replica delay circuit comprising a diffusion replica capacitor and a diffusion replica transistor in a memory component including a dummy cell with a dummy bit line, as claimed in claims 12-17 of instant Application, with the exception of a method of implementing said diffusion replica delay circuit. In view of claims 1-6 of Reference, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to come up with a method of implementing a diffusion replica delay circuit, as claimed in claims 12-17 of instant Application, since discovering a method directly associated with the diffusion replica delay circuit as claimed in claims 1-6 of Reference involves only routine skill in the art.
